SUMMARY

Final-year CS student at VIT Bhopal with hands-on experience building production-grade web applications across the MERN stack, REST APIs, and AI-powered tooling. Open to opportunities across software development, product, and tech-adjacent roles where I can contribute immediately and keep growing.

EDUCATION

B.Tech in Computer Science and Engineering

VIT Bhopal University, Bhopal

Expected 2026

CGPA: 8.47/10

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django, FastAPI, REST APIs

Databases: MongoDB, MySQL

Tools & Cloud: Git, GitHub, AWS, JWT, Cloudinary

PROJECTS

Pal-AI

Next.js, OpenRouter, Node.js, MongoDB

- Developed an AI companion platform using OpenRouter to orchestrate frontier language models, enabling multi-turn conversations, persistent memory, and contextual responses across sessions.
- Implemented model-agnostic AI routing through OpenRouter, enabling seamless integration of multiple LLM providers without backend rewrites
- Built secure backend infrastructure with authentication, rate limiting, error handling, and persistent conversation storage to support scalable AI interactions.

MacroLens Vision AI

MERN, MongoDB, JWT, Gemini Vision

- Developed a full-stack fitness and nutrition platform enabling meal logging, calorie tracking, workout management, calorie-burn estimation, and personalized health goal monitoring.
- Designed and implemented a food-specific serving system with structured serving metadata and nutrition calculations, replacing generic unit-based conversions to improve accuracy.
- Integrated Google Gemini Vision for image-based food recognition, allowing users to upload meal photos and receive AI-assisted calorie and macronutrient estimates before logging.
- Implemented workout tracking modules supporting exercise logging, workout history, and calorie-burn calculations to provide a unified view of nutrition and physical activity.

DocDispatch

React, Tailwind CSS

- Built a healthcare portal supporting providers and patients through role-based dashboards, appointment workflows, notifications, and responsive interfaces.
- Improved accessibility using semantic HTML, ARIA attributes, keyboard navigation support, and responsive layouts across desktop and mobile devices.
- Developed reusable React components and Tailwind-based UI patterns to maintain consistency and simplify future feature development.

ACHIEVEMENTS & CERTIFICATIONS

- Ranked **Top 1%** nationally in NPTEL Marketing Analytics (2025).
- Earned multiple **AWS Cloud Digital Badges** demonstrating proficiency across core cloud services.
- Certified in Blockchain Development (IBM), Computer Networking (Google), and MERN Full Stack (Ethnus).
